May 07, 2015

<b>1 Indices and tables</b>	<b>3</b>
<b>Python Module Index</b>	<b>5</b>

A syllable is a unit of organization for a sequence of speech sounds. Enter the text for syllabification. Language of each word will be detected.

**class** `indicsyllabifier.core.Syllabizer`

Syllabizer class provides methods to syllabify unicode strings

**get\_info** ()

return module info

**get\_module\_name** ()

return module name

**syllabify** (*text*)

syllabifies the given text

**Parameters** **text** (*str*) – the input text.

**Returns** text with syllables marked.

---
